16. [] LIAISON Talked to Charles Snodgrass, House Appropriations Committee staff, about an article that Chairman George Mahon had seen about several Communists working on the Senate staff. I told Snodgrass that we have not seen any information that there are any KGB types working on the staff. I said that this article was probably a run-off of the information Vice-President Nelson Rockefeller learned about as head of the CIA Commission and had told Senator Barry Goldwater (R., Ariz.). I told Snodgrass that the FBI had also reported that they have no such information either.

We also talked about the field trip Snodgrass and Ralph Preston, also of the Committee, are planning to take around 5 January. I gave him an idea of the tentative itinerary we had worked out and asked for his comments.

I also talked to Snodgrass about the possibility of the Director getting together with Chairman Mahon this week about problems involving funding on covert action projects. He later advised that the meeting could not be held this week. 25X1
